	2016	2017	Home Office		South	West	Technology	

Resultats interpretation

This dashboard analyzes sales performance from 2014 to 2018 across four key dimensions: year, customer segment, region, and category. It helps identify the most profitable areas and highlights opportunities for commercial optimization

Key metrics (general analysis)		
Indicator	Value	Quick analysis
Total profit	\$286,397.02	Strong profit – indicates good business health
Best performing category	Technology (47% of profit)	Main driver of global performance
Top region (Av. sales)	South / East	Strong sales especially in Technology and Office
Strongest year	2017	Sales peaked before a drop in 2018
Best performing state	California (+457K)	Key strategic sales region

Analysis by region & category | temporal | and geographic distribution

The category Technology dominates sales in all regions, particularly in East and South.

Office Supplies perform less well with a lower margin (12%).

The category Furniture remains steady but less strong in volume, with a moderate margin of 41%.

Sales increased from 2014 to 2017, reaching a peak in 2017 (+730K).

There was a sharp decline in 2018, probably due to a misguided strategy or a market change.

All customer segments (Consumer, Corporate, Home Office) are included, but a strong performance is observed in the Consumer segment according to filtering only by customer segment.

California overwhelmingly dominates sales.

Some states like Nevada or Wyoming lag far behind.

Recommendations :

Consolidate the presence in the South and East regions and improve the margin on Office Supplies.

Analyze the causes of the decline in 2018: decrease in orders? inventory reduction? pricing policy change?

Launch regional marketing campaigns in low-performing states.
